Yacob Hiben

Full-Stack Software Developer (Java-React)

📍 St-Paul, MN | ✉️ yacob.hiben@gmail.com | 📞 +1 507 690 8498

Professional Summary

Passionate full-stack developer with hands-on experience in back-end, front-end, and DevOps technologies. Skilled in building scalable web applications, implementing APIs, and optimizing workflows in Agile environments. Adept at leveraging modern frameworks, cloud services, and containerization to deliver efficient and reliable software solutions.

Core Competencies

Programming & OOP: Java, Object-Oriented Programming, Java Collections API, Java Streams, Threads, Flow Control, Lambdas, Method References, Design Patterns, Algorithm Implementation

Database & SQL: SQL (DML, DDL, Joins, Set Operations), PLSQL, Transactions, Referential Integrity, Database Design

Frameworks & Libraries: Javalin, Spring Boot, Spring Data JPA, JDBC, JUnit, Mockito, Logback

Web Development: HTML5, CSS, JavaScript, TypeScript, React, Bootstrap

Microservices & Messaging: Kafka

DevOps & Cloud: AWS, Docker, Jenkins, Podman, Maven, Git

Other Languages & Tools: Python (NumPy, Pandas, Matplotlib, ML), C# (Visual Studio, OOP basics)

Selected Projects

Social Media Blog API | GitHub

- Developed backend API for managing user accounts and posts
- Implemented login, registration, CRUD operations for messages

Item Management API | GitHub

- Built Spring Boot API with CRUD operations and PostgreSQL persistence

- Handled HTTP verbs and status codes for efficient client-server communication

Bistro Management App | GitHub

- Managed food orders, reservations, tables, and user permissions
- Implemented JWT-based authorization and role-based access control

RevLearn - Capstone Project (Java & React) | GitHub

- Developed platform for students and educators with accounts, courses, forums, and payment integration
- Implemented institutional accounts for course management and monitoring

---

Professional Experience

Associate Developer
Infosys Limited | Sep 2024 – Present

- Configured REST API endpoints using Javalin and Spring Boot
- Composed Service Layer logic and implemented input validation with TDD & Postman
- Developed database communication layers using JDBC and Spring JPA
- Completed coding challenges and concept evaluations to demonstrate technical proficiency
- Leveraged Docker for containerization and AWS for scalable cloud infrastructure
- Set up Jenkins pipelines for CI/CD

Trainee Developer
Revature LLC | Sep 2023 – Aug 2024

- Configured REST API endpoints using Javalin and Spring Boot
- Implemented input validation to pass unit tests through TDD
- Developed database communication layers using JDBC and Spring JPA
- Completed 96 coding activities and ten evaluations to validate skill mastery
- Wrote algorithms leveraging Java APIs for problem-solving exercises

---

Education

- **A.S. Computer Programming** – Southeast Technical College, US | *Expected Aug 2025*
- **B.Sc. Mechanical Engineering** – Mekelle University, Ethiopia | *Jul 2007*
